

PARTNER[®] Telephones

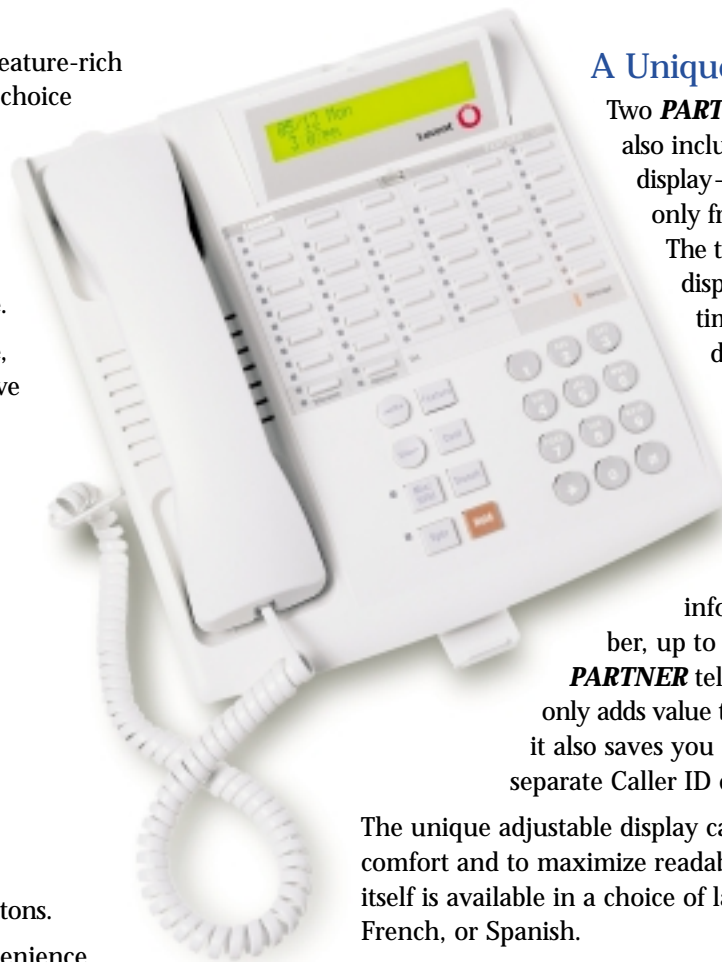

Cost-Effective, Feature-Rich Phones with Style

Lucent Technologies family of feature-rich **PARTNER**[®] telephones offers a choice of four sleek, contemporary telephones that suit virtually any surroundings and decor. The phones can be used on your desks or be wall mounted for added flexibility and convenience.

Available in black, gray, or white, all the **PARTNER** telephones have built-in features including:

- Dual LED indicators
- Two-way speakerphone
- Intercom
- Hands-free answer on intercom (HFAI)
- Hold
- Transfer
- Conference
- Message waiting light (for use with optional voice mail)
- Programmable feature/line buttons.

For ease of use and added convenience, each phone even has a pull-out tray with instructions for using and programming specific telephone features—all to help you get maximum benefit from the **PARTNER** communications system.

A Unique Display Capability

Two **PARTNER** telephone models also include a backlit adjustable display—a unique feature available only from Lucent Technologies.

The two-line by 24-character display includes the date and time, the number you are dialing, and the extension and co-worker name for internal calls that you receive.

With Caller ID¹, you also have the option of seeing *external* caller information (name and number, up to 15 characters) on your **PARTNER** telephone display. This not only adds value to your phone investment—it also saves you the cost of investing in separate Caller ID display units.

The unique adjustable display can be tilted to fit the user's comfort and to maximize readability. The display content itself is available in a choice of languages—English, French, or Spanish.

A Flexible Combination

Lucent Technologies adds more flexibility and value to business communications by making the **MERLIN MAGIX**[™] Integrated System compatible with the **PARTNER** Enhanced Tip/Ring (ETR) telephones.

Backlit Adjustable Display

Comfort-Contoured Handset

Specialty Handset Support

Hands-Free Speakerphone

Buttons:

- Grouped by Function
- Generously Spaced
- Contoured to Fingertips
- Dual LED Indicators

Pull-Out Reference Tray

Red Hold Button

That means if you are upgrading from a **PARTNER** system to the **MERLIN MAGIX** system, you have the flexibility to reuse your **PARTNER** telephones with your new system—protecting the investment you have already made in phones. In addition, the **MERLIN MAGIX** system allows you to choose the

telephones that fit your needs and your budget. Choose **PARTNER** ETR phones, **MERLIN MAGIX** 4400-Series Digital Telephones, **MERLIN LEGEND**® Multiline Extension (MLX) phones, or a combination, up to a total of 200 phones. (Your Lucent representative can tell you about differences in **PARTNER** phone features and functionality when the phones are connected to a **MERLIN MAGIX** system.)

So, you have flexibility to choose the phones that best suit your needs—to grow your communications system as your business grows, and to do it in the way that is most cost-effective for you. To learn more about the **PARTNER** family of telephones, talk to your Lucent Technologies Representative, Authorized Dealer, or Sales Agent.

All sets are available in black, gray, or white.
